

ABA: 75749418

ventral S

This is a fluorescence microscopy image of a brain section, likely from a rodent. The image shows two bright, curved structures, possibly representing the hippocampus or a similar region, which are highlighted in yellow and green against a dark blue background. The structures are symmetrically positioned on either side of a central vertical line. A horizontal white line crosses the middle of the image, and two vertical white lines are present, one on each side of the central vertical line, creating a grid-like overlay. The text 'ABA: 75749418' is located in the top left corner, and 'ventral S' is located in the bottom left corner.
