

ABA:75931565

Hb

This fluorescence microscopy image displays a cross-section of a plant, likely a root or stem, with a central vascular cylinder. The image is overlaid with a white crosshair. The ABA signal, labeled 'ABA:75931565' in the top left, is represented by a bright yellow-green spot at the center of the vascular cylinder. The Hb signal, labeled 'Hb' in the bottom left, is represented by a blue signal that is distributed throughout the tissue, with a higher concentration in the central vascular cylinder. The overall image is in grayscale, with the fluorescence signals appearing as bright spots against a dark background.
