

ABA: 76003375

SCN

The image displays a coronal cross-section of a human brain. The left hemisphere (viewer's left) shows a distinct, localized area of high metabolic activity, indicated by a color gradient from blue to yellow and red. This area is situated in the posterior region, likely involving the occipital and parietal lobes. The rest of the brain tissue appears relatively uniform in blue, suggesting lower activity levels. A vertical white line runs down the center of the image, separating the two hemispheres. A horizontal white line is positioned near the bottom of the brain image. The text 'ABA: 76003375' is located in the top left corner, and 'SCN' is in the bottom left corner.
