

ABA:76098327

OB anterior

A fluorescence microscopy image showing two distinct blue fluorescent spots against a black background. A white crosshair is centered over the image, with the vertical line passing between the two spots and the horizontal line passing through the middle of them. The spot on the left is brighter and more irregular in shape, while the spot on the right is dimmer and more circular. The text 'ABA:76098327' is in the top left and 'OB anterior' is in the bottom left.
