

ABA:76115722

DG

This is a fluorescence microscopy image of a brain section, likely a coronal slice. The image shows a blue-stained brain structure with a central vertical fissure. Two bright, localized spots of cyan/green fluorescence are visible, one on each side of the midline, near the horizontal center. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the level of the fluorescent spots. The text 'ABA:76115722' is in the top left, and 'DG' is in the bottom left.
