

ABA:77371759

SPa dorsal

This image is a coronal brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The central region, representing the midline structures, is highlighted in bright yellow and green, indicating a high level of metabolic activity or tracer uptake. The lateral regions, representing the cerebral hemispheres, are shown in a darker blue color, indicating lower activity. The image is overlaid with a white crosshair, which is centered on the bright central region. The text 'ABA:77371759' is visible in the top left corner, and 'SPa dorsal' is visible in the bottom left corner.
