Tg

This is a false-color astronomical image, likely a radio continuum map. The image shows a complex, multi-lobed structure in blue and yellow against a black background. The structure is centered around two bright yellow-green spots, which are the most intense regions. The overall shape is somewhat irregular, with several smaller lobes and filaments extending from the central region. A white crosshair is overlaid on the image, with the vertical line passing through the center of the two bright spots and the horizontal line passing through the middle of the structure.
