

ABA:78534490

Pn

The image displays a cross-sectional view of a brain, likely from a PET or SPECT scan, showing a symmetrical pattern of activity. A central region, possibly the brainstem or a deep white matter area, exhibits a distinct, localized area of high signal intensity, represented by a rainbow-colored spot (red, orange, yellow, green, blue). The surrounding brain tissue shows a more uniform, lower-level signal, depicted in shades of blue. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA:78534490' is located in the top-left corner, and 'Pn' is in the bottom-left corner.
