

ABA:79583813

SCN

The image shows a coronal section of a brain, likely from a rodent, with a blue fluorescent signal. The signal is concentrated in the central region, specifically in the area labeled 'SCN' (Suprachiasmatic Nucleus). The signal appears as a bright blue, somewhat irregular shape. The background is dark, and there are some faint, lighter blue areas. The text 'ABA:79583813' is in the top left, and 'SCN' is in the bottom left. A vertical line runs down the center of the image, and a horizontal line runs across the middle, intersecting at the center of the brain section.
