

ABA: 79591569

VMH

This image is a brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly blue, indicating low levels of activity. A small, bright yellow and red area is visible in the center, representing a localized area of high activity. This area is labeled 'VMH' (ventral medial hypothalamus) in the bottom left corner. The top left corner contains the text 'ABA: 79591569'. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the center of the high-activity area.
